## The Twelfth Jury Research and Practice Conference

**ORGANISED BY THE COURT  
OF THE FUTURE NETWORK**

These annual conferences offer opportunities for jury managers, legal practitioners, architects and academics to present, discuss and debate topical jury research and practice. In the process, we hope to further relationships between those working closely with juries, and encourage productive dialogues, collaborations and outcomes.

The keynote speaker will be Associate Professor Nikolai Kovalev (Wilfrid Laurier University, Canada). Kovalev's research has encompassed jury bias, comparative justice processes and human rights. His talk will draw from his work on the evolution of jury trials in post-Communist transitional countries.
